

A diagram consisting of several overlapping, stylized clouds of various colors (white, light blue, purple, green, yellow, blue) on a blue background. The text 'cloud based hospitality solutions' is centered in a white cloud at the top. Below it, four other clouds contain the words 'MOBILE', 'TV', 'SIGNAGE', and 'INTERNET' in white capital letters. The clouds are arranged in a roughly horizontal line, with some overlapping.

HOTstream Cloud delivers digital content, connectivity and commerce services to hotel guests and travelers on multiple devices via ONE centralized platform!

In HOTstream Cloud everything runs on the cloud and is delivered to the guest screens over the Internet. All the hotel needs is the HOTstream Cloud service and an internet connection, as our pioneer approach eliminates the need to acquire and maintain on-premise servers, racks, ups power feeds and other headend hardware.

www.mcoms.com

Through HOTstream Cloud each hotel can have the full suite of MCOMS HOTstream up and running instantly, including Free-to-Guest TV, Hotel interactive services, PMS integration, Video-on-demand and mobile apps.

HOTstream cloud is provided along with our web-based administration solution, HOTstream OMS, to allow hoteliers to monitor and manage the service using a web browser from any desktop, tablet or smartphone.

HOTstream Cloud:

All the hotel needs to enter into the future

Lower Cost - CapEx free deployment

HOTstream Cloud is an easily scalable solution. No need to spend upfront costs on IT infrastructure that gets obsolete in a few years. Being on the cloud is cost effective, flexible, and eliminates chances of owning a capital investment that is outdated. With a cloud deployment you have a clear recurring cost model directly related to resources used, allowing cost optimization.

Faster Project Deployment

On demand activation, de-activation with minimal planning, preparation and notice periods are only few of the features that eliminate traditional decision barriers making the hotelier 's choice easier and less risky. It even allows trial of the service without commitment.

Scale to meet demand as needed

As demand increases HOTstream Cloud solution makes it easy to accommodate the need for more capacity. Incremental processing, storage or network capacity increases are quicker and easier to deploy without any on-property changes. Upgrades are immediately deployed to users at no cost, greatly extending system life by keeping software current.

Lower Maintenance Headaches

HOTstream Cloud architecture reduces significantly the maintenance cost and administrative burden of IT related infrastructure. The hotel's IT staff has now less operational worries with limited on premise hardware.

Resiliency and redundancy

Cloud services run on fault tolerant first tier cloud service provider infrastructure with very high reliability that is used and trusted by enterprises world-wide. Even in the unlikely event of a service outage, restoring an alternate service instance is only a click away. Data is securely stored offsite, relieving the customer of the fear and liability of data loss or breach.

Improved Efficiency and Guest Satisfaction

Hotel guests nowadays expect to receive premium and personalized services and state-of-the-art technology is part of that expectation. The HOTstream Cloud interface offers mobile and remote accessibility from any location, at any time, allowing staff to attend to the guests needs with improved efficiency leading to greater guest satisfaction.

HOTstream suite: Any scene, any service. One experience.

MCOM Media Communications, Inc: MCOMS is one of the leading IT solution providers for hospitality, healthcare, transportation and other operators, having a large network of partners and regional offices in North America, Middle East and Africa, Europe and APAC.
